1. Introduction :-

Snowland Integrated Development Center (SIDC) is a leading non-profit non-governmental, autonomous, social development organization having the work based in Humla which is established in 1992. SIDC has been established by the local educated and the qualified residents with strong willingness and commitment possessing extensive experience in different sectors under the democratic pattern by holding the election in every 2 years by the general members for the representative of the executive body. The board comprises 9 executive members with a female chairperson including minimum of 33% of women representation. SIDC has been registered in the district administration in 1992 under the association and affiliation with the social welfare council and NGO federation of Nepal.

Several attempts were made by the different organizations in the past for the development of the Karnali. However, these were not found adequate to achieve the intended outputs and the results were still beyond our expectation because of the lack of the proper coordination and the knowledge about the typical land, place and the people where they are culturally living. Seeing the lacks and efforts made in implementing different development endeavors in the region by many organizations in the past, there is a felt need of to address equally in every aspects of development. So, SIDC is formed to fill the space being the bridge to the other stakeholders for progressive actions to bring out the concrete output in the field. Since then, people centered efforts were doing in proper co-operation, co-ordination and collaboration in implementing different development activities in the region by governmental offices, national and international organizations and other interested agencies.

The constitution of SIDC has well defined set of objectives, goals and mission to address the development equally in the district and to uplift the deprived community members who are Poor, Dalit, Ethnic and other marginalized people. SIDC realized and learned from the past development efforts because adequate attention was not given to identify the needs and demands of the community people and they lack the utilization of resources (Human) available in the region. For this reason, SIDC make a well-set vision to identify the problems, needs and opportunities for proper utilization of the resources (Human) which are crucial for the sustainable development of Karnali. SIDC believes in collaborating with the agencies at local, district and national level and solid partnership with the civil societies, NGO/INGOs and federations at all levels to generate greater synergy on all its programs to contribute to meet the national goals and objectives. SIDC always tries to address and answering some of these important issues, and promised to maintain the good relation among the people of the district for to make them empowered and make them participatory in the different fields of development.

Since its inception, SIDC has been working with the poor and marginalized people in rural Humla to empower them in the process of meeting their basic needs, improving livelihoods and building their own socio-economic status upgraded. It has always focused on gender equality and the social inclusion. It has been success to maintain the good relation among the organizations and the people of the district for to make them empowered in the field like economic earnings, infra-structure, social mobilization, education, health and awareness, agriculture and husbandry, forestry, knowledge management and skill development. Besides the integrated activities of the development in the grassroots level, it is also engaged in communication, advocacy, lobbying, networking and making the people more conscious at local and national level to promote the human rights and social justice.

Good Neighbor International Nepal has made its Project Agreement and General Agreement with Social Welfare 2021-2026, on the basis of the Social Welfare Act and by law it has done agreement with SIDC, Humla to implement the Livelihood and Health Wash activities through SIDC project. The objectives of the Good Neighbor International are to increase equitable access and participation income generation process to improve the

quality of livelihood status by supporting them in income generation and to strengthen more by the health and Wash activities.

SIDC Nepal is a reputed organization. It has worked in many sectors. It works on education, water and sanitation, health, livelihood, human rights and life skills climate change and such others many sectors. It has earned trust of the people. It made its first agreement with Good Neighbors International in 2016 to 2020 for five years. For second phase it has made agreement 2021 to 2026 AD.

Integrated Community Development Project (ICDP) has been implemented currently in four Rural Municipality (Chankheli, Sarkegad, Kharpunath and Simikot RM – former 16 VDCs of Humla district named Mimi, Darma, Shreemastha, Melchham, Gothi, Rodikot, Saya, Sarkideu, Barai, Lali, Kharpunath, Thehe, Bargaun, Raya, Chhipra and Simkot). The agreement is majorly focused on Health, WASH, Livelihood and Income-Generation activities. The completed activities are as follows up from January 2022 to December 2022 which takes a place in the respective fields and the programs are from the POA 2022.

- Training on farm and off farm IG, improved farming practices
- Formation of self-help groups
- Training and development of local resource person, lead farmers
- Support to promote and establish Agro vet
- Input and other support to ultra-poor
- Animal health camp
- Other Activities if any

Livelihood Activities in Detail 2022:-

1. Cooperative Business Network Meeting-District Level

This activity was conducted and completed at Simikot RM on 19th June 2022. The main objective of this program is to discuss the revolving fund status and further strategies for institutional strengthening of the cooperatives. In this meeting discussion on organizational status, sharing of learning, best practices, problems, issues, opportunity and revolving fund management. The meeting

was carried with the participation of cooperative chairperson and manager of 7 cooperatives of simikot, Sarkegad, and Kharpunath RM.12 members were participated. The cooperatives are Panchamukhi Dudedaha Agriculture Cooperative, Dudhkunda Mahila Multipurpose Cooperative, Mastadeb Agriculture Cooperative, Himali Organic Agriculture Cooperative, Pokhri Agriculture Cooperative, Bageshwori Agriculture Cooperative and Karnali Dovan Agriculture Cooperative. During the meeting presentation was given by CBDO about the GNI, Socio-Economic department and guidelines overview. The presentation also included the revolving fund status of cooperatives. Thereafter, discussions were held about the bad debts ways to tackle them and feedbacks and suggestions were provided from DC and ED.

2. Account Keeping Training

The account keeping training was planned for 9 cooperatives in total excluding panchamukhi Dudedaha Agriculture Cooperative. The activity has been provided to 8 cooperatives namely Himali Organic Agriculture Cooperative, Pokhri Agriculture Cooperative, Karnali Dovan Agriculture Cooperative, shreejanshil agriculture cooperative, Dudhakunda mahila multipurpose cooperative, Mastadev agriculture cooperative and Mahadev agriculture Cooperative in their respective areas. The objective of the training was to build the accounting capability of cooperative managers. The members were taught about the 4 ledger posting, balance sheet and trial balance. The training was conducted for 3 days in each cooperatives. The purpose of the training was to track the effectiveness of the previous training and also discussed on faced problem in the cooperative. Similarly, it was also to check the accounts either it has been updated or not. There was the participation of the general committee members. The objective of the program was to strengthen and re-freshen the training received in the earlier period. Since account management is a major task to maintain the transparency of cooperatives the required skill is must. The training was facilitated by Junior Technical Assistant. The major account management principles were discussed and practically carried out.

3. Cooperative Leadership Development Training

The Cooperative Leadership Development Training was planned for 8 cooperatives in total excluding panchamukhi Dudedaha Agriculture Cooperative. The activity has been provided to 8 cooperatives namely Himali Organic Agriculture Cooperative, Pokhri Agriculture Cooperative, Karnali Dovan Agriculture Cooperative, shreejanshil agriculture cooperative, Mastadeb Agriculture Cooperative, Dudhkunda Mahila Multipurpose Cooperative Bageshwori Agriculture Cooperative and Mahadev agriculture Cooperative in their respective areas. The Training started from 6-19 April and September 2022. The Objective of the training was to develop the leadership quality of the cooperative members for the institutional development. There was the participation of the general committee members. The objective of the program was to develop the leadership quality of the cooperative committee members. The training was facilitated by Junior Technical Assistant.

4. Account and Revolving Fund Monitoring Training

The account and Revolving Fund Monitoring training was planned for 9 cooperatives. This training has provided to 8 cooperative namely Himali Organic Agriculture Cooperative, Pokhri Agriculture Cooperative, Karnali Dovan Agriculture Cooperative, shreejanshil agriculture cooperative, Mastadeb Agriculture Cooperative, Dudhkunda Mahila Multipurpose Cooperative Bageshwori Agriculture Cooperative and Mahadev agriculture Cooperative in their respective areas. The training started from 6-19 april and Completed on September 2022. There was the participation of the general committee members. The objective of the program was to direct and monitor the proper utilization of the revolving fund. Since, revolving fund has been provided to the cooperatives with a purpose of

supporting and establishment the micro-enterprises. The training had strategies set-up for the effective mobilization and monitoring of the fund. It was facilitated by Junior Technical Assistant.

5. Integrated Pest Management Training

The IPM training was provided to Mastadeb Agriculture Cooperative members for chilli and Dudhkunda Mahila Multipurpose Cooperative members for True Potato Seed. Initially group of 18 farmers was formed and then nursery was set up with the direction of JTA in the farmers field in each cooperative area. Two nursery beds one according to the traditional practice and other in a scientific technique were set up. The beds were regularly inspected by the participant farmers as well as the staffs. The nursery of chilli was set up on 10th April 2022 and transplanted on June 12, 2022 and for TPS on 26 April 2022 nursery set up and was Completed August 2022. The Activities has been completed IPM training to farmers. In IPM training it was conducted on potatoes. The objective of this training was to conduct the integrated pest management program in the field. From this training the famers got knowledge and training on pest management technique specially on potato. The principle of that program was "learning by doing ".

6. Management Support to Cooperatives

The activity has been planned for 7 cooperative managers namely (Panchamukhi Dudedaha Agriculture cooperative, Mastadev Agriculture Cooperative, Dudhkunda Mahila Multipurpose cooperative, Bageshwori Agriculture Cooperative, Himali Organic Agriculture cooperative, Pokhri Agriculture Cooperative and Karnali Dovan Agriculture Cooperative) in order to motivate them to do better and for systematic Management of the cooperative. The objective of the activity is to promote effective, maintaining the 4 ledger accounts and timely reporting as well as actual report keeping for the transparency. The support from January to December 2022 has been provided for 6 cooperative managers excluding Bageshwori Agriculture Cooperative.

Likewise, it was conducted and completed for Sarkegad and Chankheli RM. There was presentation about the project activities, achievement and issues and challenges, lessons learnt and best practices. Finally, feedbacks were also collected from the participants.

5. Best Practices:-

- Communities are assessed to good health facilities due to the health equipment's support and ORC building.
- Priority to cleanliness by the community people
- Farmers are able to produce vegetables under the unfavorable environment condition as well e.g even during the snow.
- The income level of most of the farmers has been increased as compared to their situation before getting into vegetable farming.
- Students and parents are aware about the menstrual health and also about the social taboos and some are in the process of change.
- Cooperatives have been assessed to different trainings and facilities to uplift their organization.

6. Lesson Learned:-

- a) Practical session is more effective than theoretical session in the community level activity.
- b) The need assessment process has changed the thoughts of the persons. They feel negligent to respond and provide the needs.
- c) Along with training equipment support makes the training effective
- d) Regular monitoring of the cooperatives to uplift their organization.
- e) Regular follow-up with the farmers makes the work more effective.

- f) Before fixing the vendor doing the survey of the vendor status aids in the effectiveness of the work
- g) Transportation owner status survey about the transportation
- h) Wash Education and other school support programs help to increase the access towards good health.
- i) Change is possible through awareness program by changing behavior.
- j) It is necessary to have knowledge of child rights to adults.
- k) It would be better if we conduct health check up to the Non Sponcer children from our working areas.
- l) From the point of view of SIDC, it would be better and seems effective to keep such camp and trainings with taking the huge amount and specialist having with advanced instruments and facility frequently for keeping their health status good.
- m) Infra-structure and health equipment support to health posts increases the access of health service delivery to the community people. It has strengthened the health facilities
- n) Mandatory monitoring of all cooperative once in every 2 months.
- o) Program should be planned and completed on time.
- p) The program should be monitored time to time whether it is being implemented effectively or not.
- q) Field staff should regularly inform the supervisor about the programs that are going on with their responsibilities.
- r) Employees must attend in the office at time other than field work and end the process trying to finish all the work at once.
- s) Local level partnership and collaboration in various projects and programs in very importance for any types of work.
- t) Priority of emergency assistance for disaster management.

7. Challenges and Way Forwards :-

- Quotation Collection and No renewable and VAT bills are found in Humla
- Could not make a cooperative improved and run smoothly because of the low level of education status of the beneficiaries (Share Members etc.) and the cooperative management committee.
- Communication challenges due to poor network, thus delays in reporting.
- Some of the participants are oriented to daily allowances which hinders the effectiveness of the program.
- Weather and geographical complexity due to which the programs are not conducted on time.
- Difficulty in remobilization of revolving fund during the off season due to the costly price of the construction materials of poly-house and limitation of revolving fund.

- The geographical landscape and communication facility are not well in remote villages. It is difficult to deliver the message and equipment in timely.
- Transportation of the Health equipment is not easier because porter is not ready to carry uneasy materials.
- Difficulty in completion of construction work on time due to the poor transportation and fluctuation of material prices.
- Frequent monitoring by the district level staffs.
- Lack of timely coordination with local authorities, Create plan to monitor the effective implementation of each activity.
- Others options for transporting goods should be explored and for timely implementation.
- Not being able to properly use and maintain health materials as well as other assisted materials.

8. Conclusion:-

Good Neighbor International Nepal has done agreement with SIDC, Humla to implement the Livelihood, Health and WASH project activities.

GNI, basically works in the remotest places of Nepal for improving the lives of poor people for their better livelihood status and income generating activities, especially children through education, community through cooperative, health and water services, child protection, disaster risk reduction, advocacy and network building in the harsh situations and remotest places of Nepal.

There are many activities, out of them most of them are completed and some are ongoing. The future programs should be planned systematically. Every plan of the activities should be timely prepared. According to the plan, time of implementation should be allocated.

On the context of GNI program the detail analysis of the field location and work is necessary. The reporting format should be provided before-hand even if it is a quarterly report. The community people have demanded to increase more programs. Most of the farmers have demanded trainings as well which is needed for the farming. It is necessary to increase using effective norms, values and indicators to operate the programs in the field timely. The impact to Good Neighbors International and SIDC is satisfactory from the point of view of the people of the program lunched areas. It is necessary to make sustainable relationship and mutual understanding between two organizations and to the community to implement the programs effectively.

There is a need of reliable vendor to import program related goods in-time. However, the delay is due to the erratic and unusual snowfall and weather condition. For that we should be able to recognize alternative solution as well.

GNI, after the commitment with SIDC, it is implementing livelihood, health and wash program in the community regularly. According to the context of Humla, there is difficult to collect the quotation

from the vendors, procurement process also takes a quite longer time so the approval process of RR takes a long time period. Not only has this, due to the geographical condition, problem of communication also made delay in process. Even it, SIDC Humla always tries to conduct the program in the community to achieve the output of the program and the goal of SIDC and GNI. During this project lunched period, SIDC Humla has learned some lessons which GNI should take it positively to conduct the program easily and effectively in the field level. From the point of view of SIDC, it would be better and seems effective and promote the income generation process if the programs are centered in Simikot VDC for to generate the income of the locals.

It would be easier when we address these below mentioned points for the effective run of the Program in time.

- Problems in quotation collecting and no any vendor seems interested (In the context of Humla)
- Limited human resource and hard Geography
- We need to create strong coordination with the new local bodies (Rural Municipality) and representatives selected from the public to conduct our events effectively for better work progress.
